This book talks about one of the most important branches of Pharmaceutical Sciences i.e. Pharmaceutics. Pharmaceutics as we know deals with the science and art of developing a pharmaceutical product which is often called as dosage forms. Some of the popular dosage forms which we witness during our day to day life are tablets, creams, powders and syrups etc. This book has covered most of the dosage forms with their definitions, formulation details, advantages and disadvantages associated with them. This book has these chapters; Pharmacopoeias, Liquid Dosage Forms, Powders, Emulsions, Suspensions, Suppositories and Semisolid Dosage Forms. Each chapter has provided basic as well as practical details along with relevant examples with suitable diagrams, classification charts and previously asked questions based on

Essentials of Physical Pharmaceutics-I emphasizes towards B. Pharm. III-Semester of PCI Syllabus. The book offers clear understanding of the concepts. The questions have been given at the end of each chapters for better understanding of the subject. Hence the textbook is essential to pharma students. PHYSICAL PHARMACEUTICS-I ESSENTIALS OF Chapters are explained in a systematic and comprehensive manner. The subject matter illustrated with figures and tables, wherever felt necessary. At the end of each chapter multiple questions are given for better understanding. The book has been written keeping in view the requirements of the B. Pharm. graduate students of PCI Syllabus.

Human Anatomy and Physiology is a fundamental subject to understand any branch of Pharmaceutical Sciences such as Pharmacology, Pharmaceutics, Pharmacognosy and Medicinal chemistry etc. Considering the importance of this subject it was decided to bring out the current book. In the field of Pharmacy, a drug's fate can only be understood by good understanding of Anatomy and Physiology of Humans. This book includes few key chapters like Body Fluids & Blood, Lymphatic System, Cardiovascular system, Digestive system, Respiratory System, Urinary system, Reproductive System and Genetics. Several simple diagrams, sketches and figures are included to make the subject simple and easy to grasp. These features will certainly fulfill the requirements of students, Teachers and Readers in general. In addition to this, the book

#### ABOUT THE AUTHOR

Dr. Asra Jabeen is working as an Associate Professor, Department of Pharmacognosy at Bharat Institute of Technology, Mangalpally, Hyderabad. She was awarded her PhD from Annamalai University in the year 2022. She holds an academic experience of 12 years and presented many papers at various conferences. Guided students at UG/PG levels and have over 18 scientific publications to credit.

Mr. Abhilash Dash currently working as Assistant Professor at Gayatri Institute of Science and Technology, Gunupur, Rayagada, Odisha. He has been Published Research Paper in well known national and International Journal. He has attended many national and international seminar and conference and also life member of APTI and IPA.

Miss Subhashree Sahoo is currently working as an Assistant Professor (Pharmacology) at Usha Martin University, Ranchi, Jharkhand with total 1.5 years of teaching experience. She has published many review and research publications and podium presentation at various national and international conferences, symposia and convention.

Prof. (Dr.) Kirtimaya Mishra is young and dynamic teacher cum researcher. He was awarded his Ph.D. from Annamalai University, Chidambaram, India in the year 2020. Currently he is working as Professor in School of Pharmacy, ARKA JAIN University, Jamshedpur, Jharkhand, India. Prof. (Dr.) Kirtimaya Mishra has 13 years of research and teaching experience. He has published many articles at national/international journals of repute.

### Peer-Review History:

This chapter was reviewed by following the Advanced Open Peer Review policy. This chapter was thoroughly checked to prevent plagiarism. As per editorial policy, a minimum of two peer-reviewers reviewed the manuscript. After review and revision of the manuscript, the Book Editor approved the manuscript for final publication. Peer review comments, comments of the editor(s), etc. are available here: <https://peerreviewarchive.com/review-history/7097E>

### ABSTRACT

Worldwide, cancer is a leading cause of death in both developed and developing countries. Numerous natural and manmade anticancer drugs treat solid tumors, lymphomas, and leukemias in different forms. In this work, nine 6-fluoro-triazolo-benzothiazole derivatives were prepared and evaluated for *in vitro* antimitotic activity. In addition, an *in-silico* study was also done using tubulin protein (PDB: 6QQN) by molecular docking method. Thin-layer chromatography (TLC) was used to monitor the progress of the reaction progress. Results revealed that TZ2 and TZ9 were the most active compounds with antimitotic action opposing the standard drug, aspirin. Results of molecular docking exhibited the inhibitory potential of triazole-benzothiazole against tubulin protein. The mitotic study indicates the efficacy of triazole-benzothiazole analogues in inhibiting the

# Insights On Corona Virus Disease (Covid-19): Prevention and Treatment

Dr. Gade Kalyani\*

Dr. Gatadi Srikanth\*\*

Dr. Rameshreddy Rajasekhar Reddy\*\*\*

## Treatment Strategies

**E**ntry of SARS-CoV-2 into host cells is facilitated by the binding interaction of the CoV (S) protein to the target cell ACE2 receptor or Glucose regulated cell surface receptor protein (GRP78) and transmembrane protease serine 2 (TMPRSS2). Hence, it is sensible to postulate that compounds influencing this interaction could be prospective antivirals<sup>1</sup>. Ramos-Toyar and Muriel described the antiviral activity of Glycyrrhizin (GL), a foremost component from licorice root called *Glycyrrhizae Radix*<sup>2</sup>, which was able to inhibit SARS-CoV entry into Vero cells. Shah and coworkers showed
